REASONS FOR ALLOWANCE

The applicant's response filed June 1, 2004 to the Office Action has been entered. Claims 1, 3 and 5-26 are pending.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 1, 3 and 5-26, no prior art has been found teaching or suggesting the method of constructing a DNA library in vivo comprising providing a plurality of host cells, a vector molecule having a first region and a second region, a plurality of nucleic acid insert molecules in that each insert molecule has a first common region, a library element and second common region, allowing homologous recombination and gap repair between the vector molecule and only one nucleic acid insert molecule to occur and generating a plurality of vector molecules from the plurality of host cells, each vector molecule of the plurality comprising a different library element encoding region, and each vector comprising only one library element encoding region thereby constructing a DNA library.

The closest prior art is the reference of Andersson et al. (Analytical Biochemistry, 1996, pg. 236, pg. 107-113). Andersson et al. disclose a method for efficient construction of library. Andersson et al. do not disclose the plurality of inserts which have a "first common region" and a "second common region" which is homologous with the first region and the second region of the vector and do not disclose homologous recombination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
